

LTR RF Sensor

UNIVERSAL & PROGRAMMER TPMS SENSING

Rubber & Metal

LTR-03 RF sensor is designed to offer an upgraded TPMS solution for repair shops and tire shops, which features high RF signal to copy all original sensors and unlimited programming of Launch sensors.

FEATURES

- 30% smaller than first generation sensor is good for installation.
- Optimized RF antenna for better signal transmission.
- Compatible with more than 98% of DE sensors in 315MHz / 433MHz.
- The pressure value of LTR-03 can be accurate to 0.1BAR with an international leading automotive-grade chip.
- Able to replace all the OE tire pressure sensors, copy the DE sensor data and can be programmed for unlimited times.
- Over-the air wireless programming and battery life lasts for 4 to 6 years.

LAUNCH UNIVERSAL & PROGRAMMABLE TPMS SENSOR

Cover 98% Vehicle
Tpms Application

315mhz + 433mhz

30% Smaller Than
First Generation Sensor

Battery Life
of 4 to 6 Years

Be Programmend
an Unlimited Number of Times

0.1mm

High
Optimized RF Antenna

SPECIFICATION

OPERATING FREQUENCY	315MHz / 433MHz
BATTERY VOLTAGE	3.0V
RF TRANSMITTER POWER	5~8dBm
STORAGE TEMPERATURE	-40°C~125°C
WORKING TEMPERATURE	-40°C~125°C
IP RATING	IP67
DIMENSION	42.5*19.5*73(mm)
WEIGHT	28g
WARRANTY	2 years
